

**Pre-K** marks the beginning of a child's educational journey. It is essential to provide them with the right learning tools that align with their developmental needs. At Doamago, our program emphasizes this foundational approach. In this course, children will learn to write numbers and letters, helping them build strong writing skills and foundations for future learning.

## Benefits:

- 1. Learn to Write** – Children will practice writing numbers and letters.
- 2. Develop Writing Skills** – Improves hand coordination and fine motor skills.
- 3. Boost Confidence** – Encourages early literacy and math skills.
- 4. Stay Ahead** – Gives children an early advantage in learning.
- 5. Enhance Thinking Skills** – Improves focus, memory, and problem-solving.
- 6. Prepare for Kindergarten** – Makes the transition to school easier.
- 7. Encourage Creativity** – Engages children in fun and imaginative activities.
- 8. Improve Social Skills** – Helps children interact and communicate better with others.

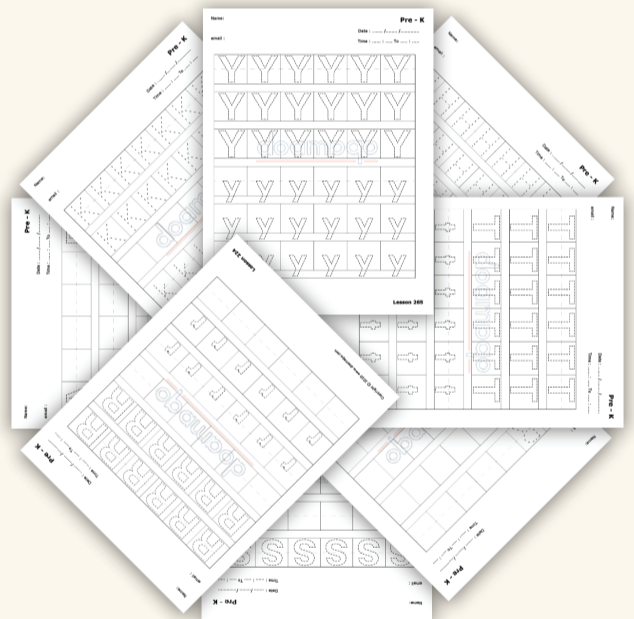

Course Name : Pre- K  
Student Age : 3 to 4 years

### Curriculum

Number : 1 to 100  
Letters : A to Z  
Addition : Concept introduction  
Subtraction : Concept introduction

## Instruction

Students can complete one lesson per day, with a total of six lessons over six days. After completing the chapter, the next chapter will be unlocked after 7 days. Please ensure children do not attempt more than 1 lesson per day to maintain a healthy and effective learning pace.

Many parents and teachers are facing challenges with students' handwriting. This is largely due to their reliance on online learning platforms, which has reduced their interest in writing. As a result, their writing skills are underdeveloped, and correcting these skills later becomes increasingly difficult. This platform addresses this issue effectively by fostering strong writing habits from the very start of their educational journey.

Our team consists of 17 passionate educators with a combined 20+ years of teaching experience, dedicated to helping children unlock their full potential. Our curriculum is rooted in research-based insights into child psychology, making it the most advanced framework for building strong educational foundations. We take pride in guiding children toward the right platform to ensure a bright and successful future.

**"If you are not satisfied within 30 days, we will gladly issue a full refund."**
